James Ruiz

Irvine, CA | jamesgr@uci.edu | (510) 660-3212 | linkedin.com/in/imjamesruiz | github.com/imjamesruiz | www.imjamesruiz.com

CS student and former Implementation Consultant Intern bridging technical delivery and client needs, with hands-on experience in cloud migration, enterprise API integrations, and ETL pipelines.

Education

University of California, Irvine Expected June 2027
Bachelor of Science in Computer Science, GPA: 3.30/4.00 *Irvine, CA*

Relevant Coursework: Data Structures, Algorithms, System Design, Operating Systems, Computer Organization

Experience

Incoming MES Software Engineering Intern Jan. 2027 – Mar. 2027
Harbinger Motors *Garden Grove, CA*

Software Implementation Consultant Intern June 2026 – Aug. 2026
OneInc *Folsom, CA*

- Partnered with client teams across 4+ enterprise implementations to gather integration requirements and translate them into PremiumPay REST API and webhook configurations for platforms including Guidewire.
- Managed configuration rollout through 9 test and production environments, coordinating with client and internal stakeholders to align on release readiness.
- Designed and executed 50+ UAT and API validation tests in Postman, resolving deployment issues before each production release and reducing go-live risk for clients.
- Cut mean error-diagnosis time by 60% for client payment flows by analyzing Grafana request logs and documenting recurring failure patterns for support teams.

Software Engineering Intern Jan. 2026 – June 2026
ProGroup *Irvine, CA*

- Built backend extraction and normalization services for a multi-tenant license analytics platform, processing 70,000+ Revit/Autodesk telemetry records to give clients visibility into license usage.
- Improved aggregation accuracy by 40% and reduced manual validation work by writing SQL and Prisma queries to detect duplicate records and anomalies.
- Added input validation and non-blocking ingestion safeguards to TypeScript REST APIs so malformed records no longer stalled the pipeline.

Data Engineering Research Assistant Oct. 2025 – Feb. 2026
Cognitive Neuroscience of Sleep Lab, University of California, Irvine *Irvine, CA*

- Defined data requirements with researchers and built a Python ETL pipeline processing 1,524 files (361 MB) of wearable sensor data over an 80-day study, with automated device sync and run logs for failure triage and backfills.

Digital Consultant, DASH (Digital Accessibility Support & Help) Mar. 2025 – Apr. 2026
Division of Teaching Excellence and Innovation, University of California, Irvine *Irvine, CA*

- Consulted one-on-one with faculty to translate ADA, Section 508, and WCAG 2.1 AA requirements into prioritized, actionable fixes for their courses.
- Audited and remediated 400+ instructional documents, including lecture slides, PDFs, and websites, using HTML, CSS, JavaScript, and WAVE.
- Redesigned visual, navigational, and media assets (alt text, semantic HTML, ARIA roles, color contrast, keyboard navigation), improving instructional efficiency by 25% and benefiting 35,000+ students.

Projects

Cloud-Native Microservices Task Platform | *Java, Spring Boot, React, Docker, Kubernetes, AWS EKS, GitHub Actions*

- Architected a 6-service Java Spring Boot platform with 20+ REST endpoints, a React front end, and JWT authentication with role-based access control.
- Led a cloud migration from AWS ECS to Kubernetes on EKS with a GitHub Actions CI/CD pipeline deploying via Helm, cutting per-service rebuild time from 2 min to 20 s.

Retail Inventory Analytics Warehouse | *Python, SQL, Snowflake, dbt, AWS S3, Terraform, Jenkins*

- Designed an analytics warehouse giving retail stakeholders a unified view of inventory, integrating four data sources into Snowflake through a Python and dbt ELT pipeline with raw payloads preserved in AWS S3.
- Codified infrastructure as 38 Terraform resources and automated 77 data tests in a Jenkins pipeline, sustaining a 100% success rate across 360 runs.

Skills

Languages: Java, Python, SQL, TypeScript, JavaScript, C++, HTML, CSS
Cloud & DevOps: AWS (EKS, ECS, EC2, S3, Lambda, RDS, IAM), Docker, Kubernetes, Terraform, Jenkins, GitHub Actions
Data: ETL/ELT, Snowflake, dbt, MySQL, PostgreSQL, Microsoft SQL Server
Consulting & Delivery: Requirements gathering, stakeholder communication, UAT, Agile/Scrum, technical documentation
Certifications: AWS Certified Cloud Practitioner (in progress, Oct. 2026); AWS Certified AI Practitioner (in progress, Dec. 2026)
